- TypeScript
- Node
- MongoDB

LANGUAGES

- Polish (native)
- Spanish (c1)
- English (b2)

CERTIFICATION

Salesforce Certified B2C Commerce Developer

Credential ID: 4113036

ABOUT ME

I started a degree in Computer Science at the Polytechnic University of Madrid. I left the university without completing my studies as I would see them as a waste of time. As I had some experience from few personal projects, I started an intership at Oxygen after which I would land my first real job at Sugerendo as a Fullstack Developer. I worked with different technologies and I am always looking forward for the challenge of either learning something new or mastering anything I've already knew.

EXPERIENCE

Fullstack Developer at Sugerendo - November 2023/Today

At Sugerendo, I would participate in developing multiple online shops for companies from across Europe using mainly Intershop and Salesforce B2C Commerce.

Fullstack Developer at OXYGEN - June 2023/November 2023

Internship which consisted on developing two web applications for a company from the hotel sector

EDUCATION

Training Fullstack at OXYGEN Academy - May 2023/June 2023

Course to learn the basics of web development, before the internship.

Degree in Computer Science at UPM - 2020/2023

Technologies: Java, C, Bash, MySQL
